

PVC BACKED COIR

Classic and Effective

Traditional and modern materials combine to deliver performance

Manufactured from high-quality Sri Lankan coconut coir fibre, this matting system is one of our most popular for interior entranceways. Birrus PVC BACKED COIR provides excellent performance even in high traffic areas. It also brings a pleasing design aspect to both business and residential entrances.

BIRRUS PVC BACKED COIR DESIGN

Available in natural honey and black, this matting system can be sized to suit your entranceway design. To ensure the best appearance, we use only the best coconuts, so our coir has the highest quality of fibre. This delivers a consistent colour without striping.

BIRRUS PVC BACKED COIR PERFORMANCE

The PVC resin backing both minimises shedding and provides the grip required to stop the mat from moving under constant use. The coir itself offers an effective shoe cleaning surface that helps fast moisture evaporation, whilst being durable and easy to clean.

BIRRUS PVC BACKED COIR MANUFACTURE

Coir production is a vital industry for small towns and villages in Sri Lanka. The growing, harvesting and processing of the coconuts provides long-term employment which supports local economies. Coir is also an eco-friendly and sustainable product. Our supplier has been in the fibre industry for over 130 years and Sri Lanka is the undisputed leader in the production of coir-based matting.

BIRRUS PVC BACKED COIR SYSTEMS

BIRRUS PVC BACKED COIR

Coir fibre is extracted from coconuts and processed to produce yarn. Our manufacturing process then cuts and tufts this fibre to the required length before moulding it with a high-quality PVC backing. Birrus can cut your matting to the shape and size you require and provide quality mat-well frames in aluminium, brass or stainless steel to complete your matting system.

The natural colour and consistency of our coir fibre shows that it is of the highest quality. Like all natural products, coir is subject to natural variation and minor irregularities in the same way that wood or leather products are.

BIRRUS PVC BACKED COIR TECHNICAL SPECIFICATION

100% MADE IN SRI LANKA

- 35% natural coir fibre
- 65% PVC (Contains PVC Resin, Calcium Carbonate, DOP & Chlorinated Paraffin Wax)

AVAILABLE IN THE FOLLOWING PILE LENGTHS

- Natural honey coir – 15mm/20mm/23mm/30mm
- Dyed black coir – 15mm

MAT-WELL FRAMES

- Mat-well frames can be made to order in aluminium, brass or stainless steel.
- These can be fully welded or loose, mitred and drilled for screw fixing.

NOTE:

- Like other natural products, exposure to the Australian sun may cause colour fading over time and this should be considered in your selection.
